

# STATE *of the* ARC

SUMMER 2018

## BUILDING SOLUTIONS

### Evansville Country Club

ARC recently began renovations at Evansville Country Club, including major renovations to the existing serving kitchen, the main kitchen, and the back-of-house area connecting the two. Improvements include replacing kitchen equipment, remodeling walls and ceilings, resinous flooring throughout the kitchen area, new lighting, painting, and modifying air handling units. Renovations are also taking place at the grill area which includes new ceilings, a renovated bar, lighting, new dining area and transforming the card room into a new lounge and bar area.

### Dunkin' Donuts

ARC recently finished construction on the new Dunkin' Donuts on First Avenue in Evansville, Indiana. This is the first Dunkin' Donuts to return to Evansville. The scope of the work included completely demolishing the interior of the building as well as removing the existing exterior finishes. Our crews replaced the entirety of the structure's finishes including new EIFS (exterior insulation and finish system) cladding, a new parking lot, concrete work, roof, drywall, framing, FRP (fiberglass reinforced panels) in the kitchen, as well as new kitchen equipment.

### Owensboro Airport Fire Rescue Station

ARC recently broke ground in Owensboro, Kentucky to build the new Owensboro-Daviess County Airport ARFF Station. This new state-of-the-art facility will serve as a fire station for the airport and the surrounding area as well as the regional disaster relief center. Encompassing more than 15,000 square feet, this building will include three large bay doors, living quarters for the firemen, locker rooms, kitchen and dining areas, and a training conference room. This project requires some extensive site work including Vibro-Piers, as well as 1,500+ earthquake drains—high flow capacity vertical drains that stabilize seismic slopes and prevent lateral spreading.

# Tecumseh High School Athletic Fields

ARC is currently building new additions to the Tecumseh High School Athletic Fields. This project includes a major overhaul to the existing areas as part of a two-phase project.

The new additions will include a new press box, new fieldhouse with locker rooms and concessions, additional site parking for the football stadium, and various site improvements around the new baseball field. Another feature of the project is more than 35,000 square feet of additional sidewalks.

## Thinking about renovating or building a new facility?

Call us with any questions you might have to help design or construct the building to meet your specific needs. Call Danny Bateman at 812-426-0481 or toll free at 877-225-6410.
